

Instructions: Scale the black squares on layer 2 to match your grid. Use the exact width and height transformations, rather than scaling by hand.

Then size the clip mask on Layer 2 to match the size of the Arucos.

Insert your Charuco image on layer 2 and send it to the back. Move the upper left corner of the first Aruco image to line up with the clip mask, then scale from that corner and make sure the bottom right Aruco lines up properly. Then apply the clip mask
